Nepal

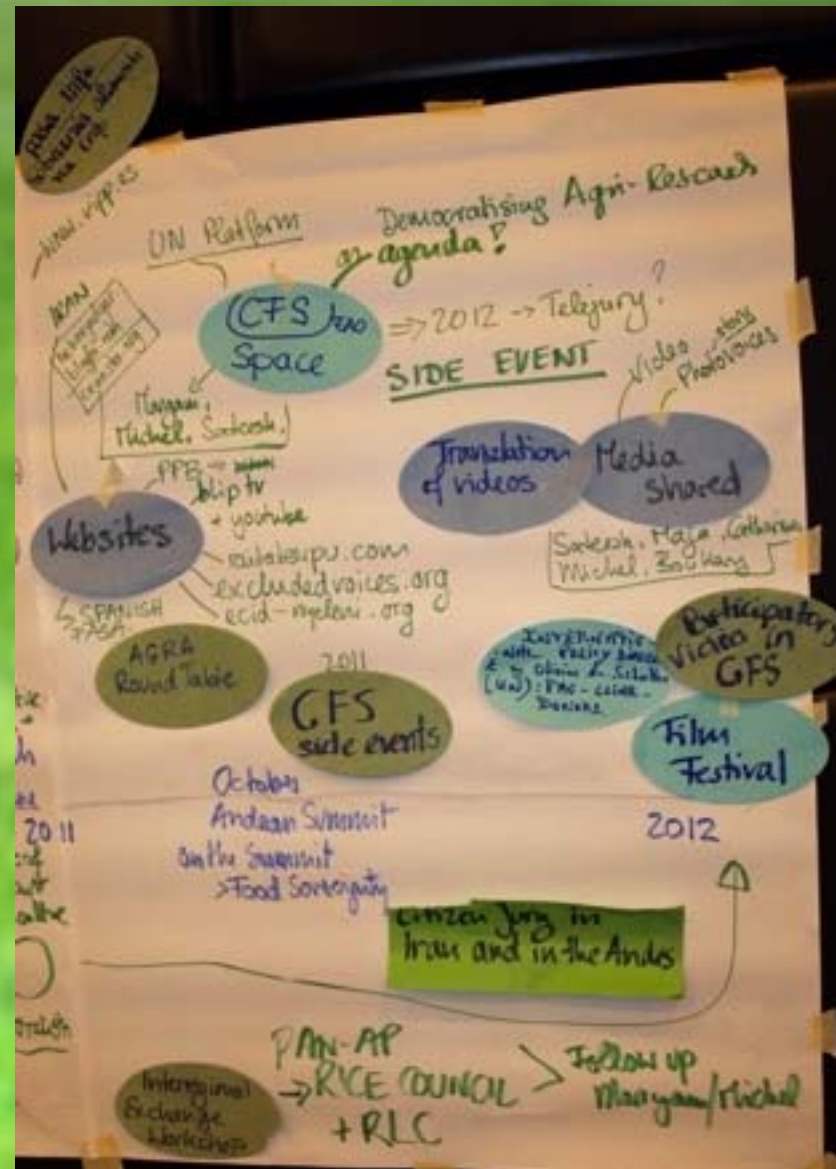

Organic Farming, visiting Kenny and Lee in Ipoh
Nov. 28 and 29, 2010

Follow up - global

Follow up - info and agreement

What to improve next time

1 idea x person:
What can we
improve next time
?

- everyone should bring & show progress
- to have more wise people present (first ideas)
- have good translators
- have 1.5 day more to envision the future
- more wise elders → contributed to farmer-scientist dialogue
- show more own experience - concrete -
- totality of the network
- to think ahead better to prevent conflict of schedule
- collective preparation & consultation ahead of time (so to bring what is needed)
- to know the agenda before so we can be well prepared
- look at differences of our concepts, approaches & methods

- 0.5 day - surprising methodology - time to prepare our intervention
- expecting about the format so that we can give our best
- concentrate on the topic of agricultural research (contents broadened)
- mix people more - learn other languages
- too sedentary - make it more nomadic
- more French & other local languages - not all in English
- be like a farmer - have time to relax & rest & dance
- homeworks - visa requirements
- longer time for preparation - make it a bit longer - slower pace
- more translators
- rapporteurs - brut
- in depth facilitation - we missed Michel
- each person writes his/her story

a unique experience
